St. Norbert College

THE FORUM 2022

The Undergraduate Research Forum highlights the valued tradition at St. Norbert College of collaboration taking place in laboratories, studios, and other scholarly or creative settings between our students and our faculty and staff, resulting in a rich array of scholarly research and creative work. This celebration features projects that evolved out of independent studies, directed research, class assignments, and casual interactions as well as formal collaborations supported by internal and external grant funding.

GUEST SPEAKERS

Friday, April 29 • Library Flex Space

Mark Patel, *Founder of Luna Cafe*

Mark Patel was born and raised in Kenosha, Wisconsin, and attended Pomona College in Claremont, CA, before returning to Wisconsin to attend and graduate with a BFA in film from UW-Milwaukee. He began working in coffee in 1994 at Alterra--now Colectivo--and was head roaster there until 1999. While in Milwaukee, Mark wrote the occasional jazz article for The Shepherd Express, Milwaukee Journal Sentinel, and other local publications. He moved to Green Bay in 1999 to open Luna with his partner, Angela, and has operated for 22 years under the same partnership to the present day. Mark remains active in the arts, occasionally presenting films at the Neville and Luna, and presenting music at local schools, most recently Ken Vandermark and the annual Charles Mingus celebration at UW-Green Bay. Mark lives in De Pere with Angel and their three sons, one dog, and several cats, and he roots for Manchester City, his grandfather's team!

Bill Tressler, CEO of Hinterland Brewery

My wife Michelle and I started Hinterland in an old cheese factory just outside of Green Bay, Wisconsin (my home town) with nothing more than our own limited funds, sweat, passion and insanity. It was 1995, and we were 24 year old college grads grinding out corporate jobs and dreaming of doing something that people actually appreciated. While trying to discover the meaning of life, I poured most of my effort into music and tried to land a record deal while playing with the band Lucky in San Francisco. Our coast to coast travels in my VW Bus, twists and turns landed me a gig as editor for Beer, The Magazine where I just got hooked into the beer-making world. It was this explorative journey to find our own Hinterland that gave the brewery its name and its mission.

In 1995, after I nearly burned down the brewery (not kidding), we decided to expand and renovate a turn-of-the-century Green Bay meat-packing warehouse into a production house—and a restaurant featuring farm-to-table culinary experiences.

Now twenty seven years later, Michelle and I still lead the spirit of Hinterland through a passionate and talented staff. Along the way, we've launched three restaurants because we believe in great ingredients and great tasting experiences. At the end of the day, we really enjoy hanging out with friends talking about killer beers and exceptional food.

We are also more than excited to invite guests to experience our latest restaurant, located across the street from Lambeau Field in Green Bay's Titledown District. This new location takes the pioneering, Hinterland philosophy to a whole new level. Come visit us and I'm sure you'll agree.
