Global Service-Learning

"This experience taught me a lot about the workings of nonprofit organizations. I was focused on organizing a Gala Fundraising event that raised over 1 Million Rand (\$72,000) to benefit young adults and South African students through the after school programs.

The most rewarding part of my service was feeling a part of an organization that was helping a community that I never would have interacted with by simply going to school while studying abroad. I got to know different members in the community and understand the challenges that South Africans face."

"My service experience was an opportunity for me to validate my Spanish language abilities outside of the classroom. If I wanted to communicate with community members at my service site I had to speak Spanish. This experience aligned well with both of my majors (Spanish and Sociology) and really spiked my interest in doing post grad service in a Spanish speaking country."
